

Our History

from 1961 to the present

la nostra Storia

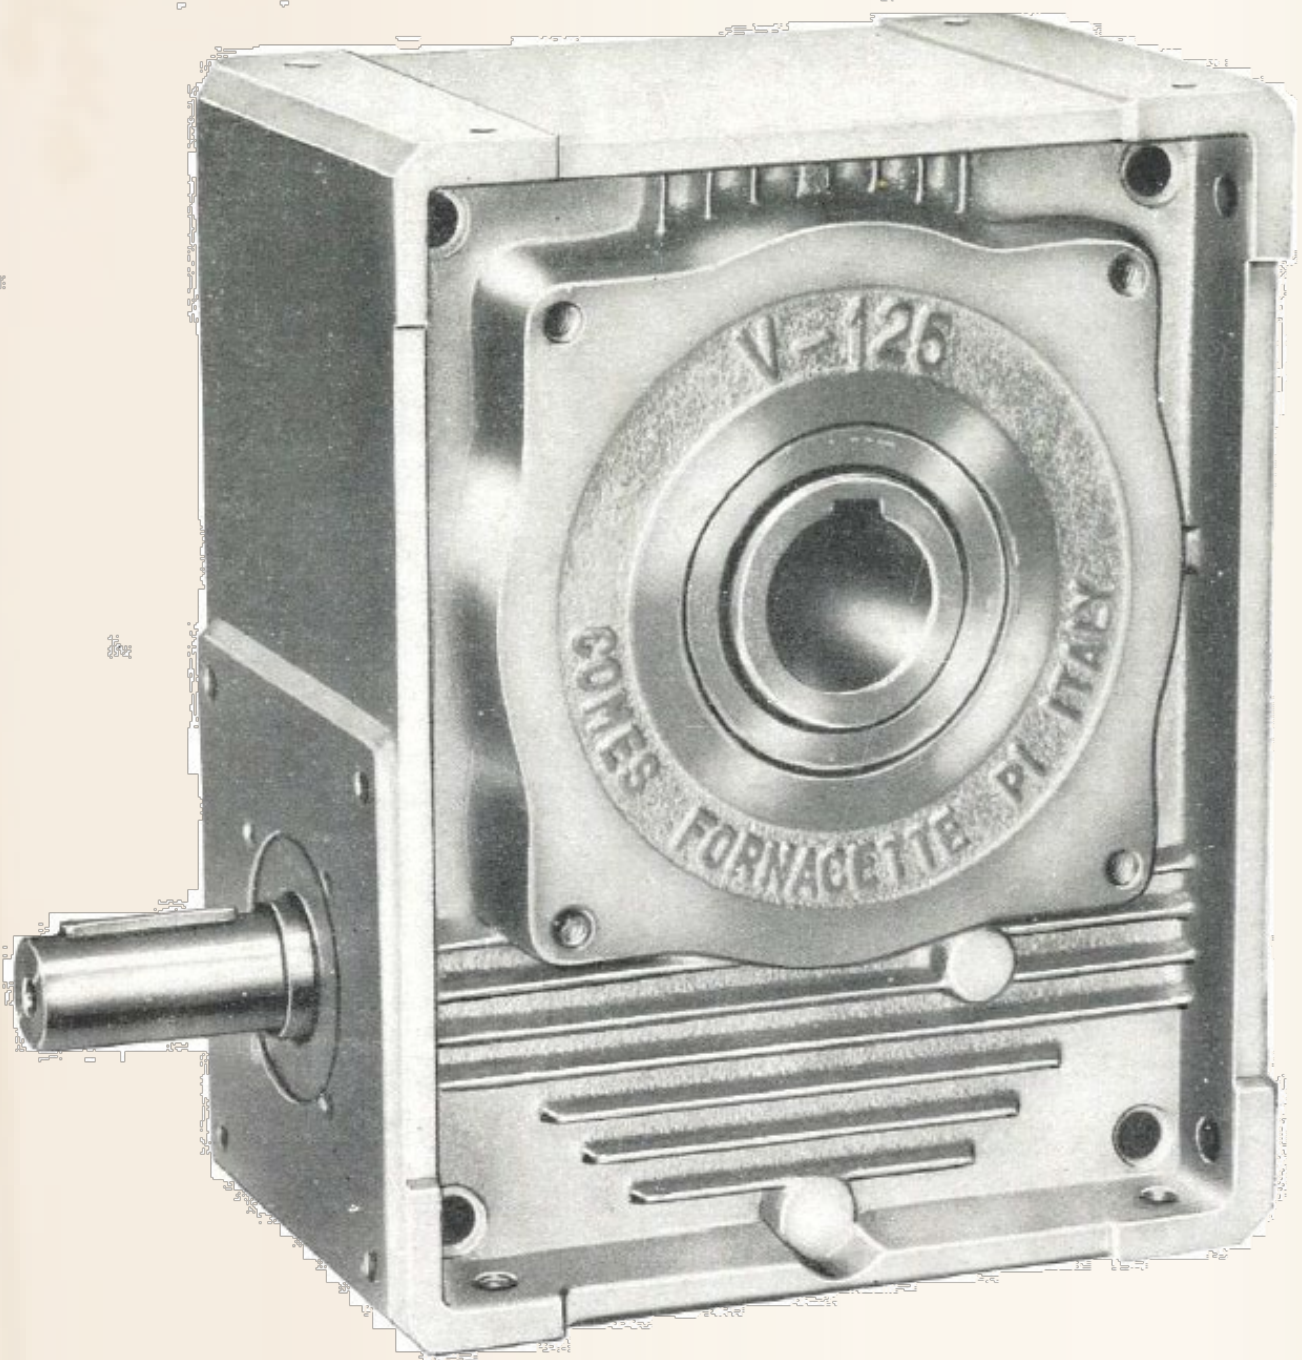

ROBERTO SIGNORINI 1961

**CO.ME.S. Costruzioni
Meccaniche Signorini** was born
in **1961** out of the passion and
inventiveness for precision
mechanics of **Mr. Roberto
Signorini**, who with scarce
means but lots of **enthusiasm,
genius and business acumen**
produced his first patent as early
as 1967 for a device for the steel
pipe market.

Our History

The second patent came in **1970**: it was for a cutting-edge
"SPEED REDUCER"

that was much more innovative than those that existed back then, leading to the development of one of **CO.ME.S's** two main product lines, **SPEED REDUCERS** and **SPEED VARIATOR-REDUCERS** which are still built in a wide range of types and sizes and can be installed on any kind of machine tool, especially those used to process marble and granite.

Our History

*Driven by the lively minds and inquisitive spirit of the **Signorini family**,
in **1984** CO.ME.S achieved its greatest technical
and commercial success by designing and patenting the very first*

TILT ARM POLISHING HEAD

WITH A SWING ARM GEOMETRY

which was an instant hit on the marble and granite processing market.

*The success met by the '**POLISHING HEADS**', entirely designed and
manufactured in **CO.ME.S.**'s own factory, led the company to increase its output
and gain ground on the international markets.*

*In **1989**, the company grew so big that it had to change its corporate structure,
turning into a joint-stock company, from a family business to an industrial player.*

Our History

In the years
CO.ME.S

*has become a world leader in the
stone sector with a succession of
increasingly cutting-edge patents
and innovations.*

Our History

ROBERTO SIGNORINI 1961

Within the **Signorini family** the passion for mechanics has been handed down through the generations.

FROM FATHER TO SON... FROM "HEAD TO HEAD"; in over half a century of its life, **CO.ME.S** has grown in terms of innovation and technology

Our History

Machinery Division

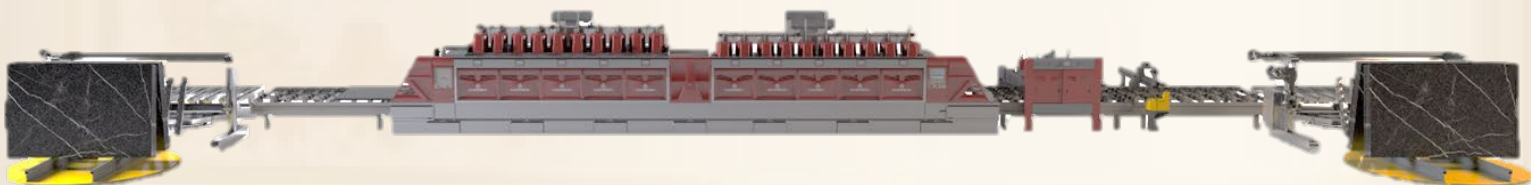

Giuliano Signorini, son of Roberto, the founder, was fascinated by his father's passion since he was a very small child.

As he grew and took the helm of the company, he pursued even more ambitious plans:

*His passion led to the birth of the **CO.ME.S. MACHINERY DIVISION**, a pioneering machinery plant that builds full polishing lines to meet the complex requirements of the international stone market.*

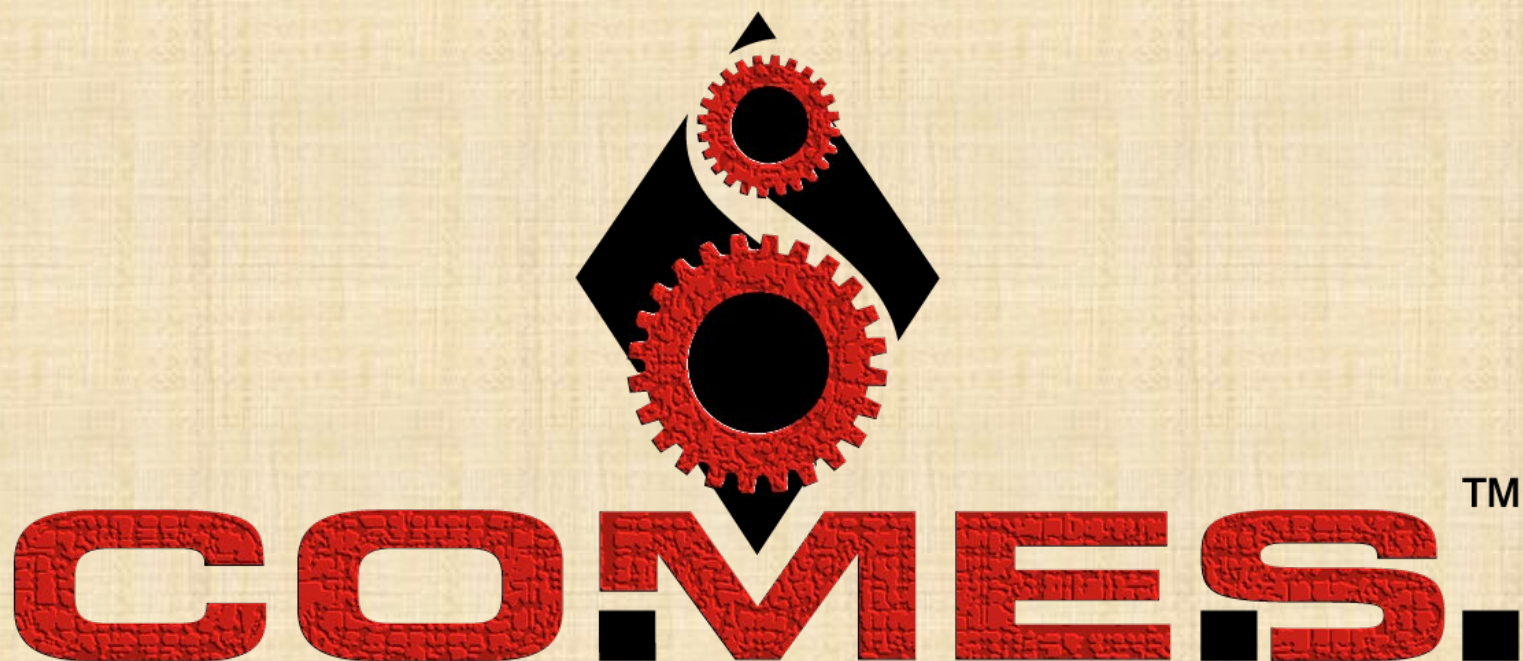

Our History

***CO.ME.S.'s success** has attracted the interest of the best papers and magazines, which wanted to interview the founder's son, **Giuliano Signorini**, and find out more about the company's business ethos.*

After all, when art and beauty embrace technology, the result cannot but be amazing.

CO.ME.S. looks to the future** with the experience of the past, **outstripping all others in polishing heads** as well as in **polishing machines.
